This quick guide explains how to find the secret ending of an update. Pacify is a horror game in which players are working for parasitic activity helpers (PAH) to get rid of supernatural entity locations. The base game is entering a very old house to complete various objects to deal with the angry spirit of the little girl, in which the player peacefully pursues the player. However, the farm update added a whole new map to the game, paired with new enemies and new goals. As with the base game, there is a secret ending that players can find. So here's a quick guide on how to find it. In any ending, the first thing a player has to do is defeat the monster and (hopefully) put together a clue that hints at the origin of the monster. These tips mention boxes that can be used to trap evil, such as old trinselves, where water is needed to enable poison and can activate the magic of windmills. But players need to be the first to get into the house. On the first or second floor of the house should be several bolt cutters that can be used to open the doors of the entire map. This includes barns where poison is held. In the attic there is an old trinite listed in one of the notebooks. It is an angel statue that can heal injured allies when you take them to the windmill. Also, later grab one of the frying pans from inside the kitchen to kill the chickens. At the back of the house there is a freshwater source that can be activated. It is necessary for the player of the water source to dump the poison to create a green chicken. These green chickens can then be supplied to the farmer to begin to weaken her. When enough green chickens are given to the farmer, she moans loudly and she slowly starts rimming towards the spawn area where she eventually loses her weight. Players have to grab wheel-wheeled cars to move farmers around. From here, the player can choose which ending to pursue. Remember that box listed in the notebook because it triggers a peaceful and secret ending? Take the farmer to the box. This will probably siphon the evil eating spirit in the box and seal it. Then the secret ending can be caused by returning to the van empty-handed. But fun fact: bosses fight the Easter eggs available in this ending. When bringing the farmer into the evil seal box, put the green chicken inside. Then a small light must have a huge green chicken on the farm - no joke. It's big, neon green and comically defenseless. The biggest problem should catch up with it because it runs so fast. But like other chickens on the farm, the way to beat this creature is to hit it in a frying pan. For obvious reasons, this chicken requires more than one chicken's before the keel. But when the chicken boss tears into his final rest, the player can still get close to the van and find a secret ending.
